

# First Card booking card

**First Card booking card is an extension of the travel account. The card is used for reservations via the Internet and is limited to products and services related to travelling.**

## First Card

The purpose of First Card is to make life easier for the traveller and provide an overview of the trip. We have roots in the travelling business and consequently, First Card is designed to make travel administration more simple and cost efficient for both the company and the travel agency. We have unique integration to the backoffice systems of leading business travel agencies in Denmark.

The First Card booking card is a virtual MasterCard and the card can be used for online reservation with airline companies, travel agencies, hotels and car rental companies all over the world.

## The booking card

With this card you can place all travel related services booked online on the travel account. And reservations can be made in most of the modern self-reservation systems.

The booking card can only be used for online reservation as it has neither a magnetic stripe nor a chip. Consequently, a booking card cannot be used in shops or for cash withdrawals. The booking card works best as a supplement to First Card.

## Flexible invoicing

Choose between different invoicing models – both in terms of invoicing date and frequency. First Card is the only credit card that will be adapted to your payment routines and not vice versa. Card and travel account transactions can be invoiced at the same time.

## Statistics Online

Statistics Online gives your company full control over travel and entertainment expenses. Here you can follow up and get data for future negotiations. Statistics Online is a tool that gives relevant employees access to statistics via the Internet. With Statistics Online you can easily see information about card volumes, where the cards have been used, volumes on the travel account and statistical data about all of it.

## Advantages of the booking card:

- The card is limited to purchases related to travelling.
- It is a safe and secure card both for the company and for the traveller.
- Invoicing is flexible.
- Among other things, the card can be used for booking budget air tickets on the Internet, for hotel guarantee and in self-booking systems.
